DETAILED ACTION

1. This Advisory Action is in response to the After-Final Amendment filed on 9/1/05.

Response to Arguments

2. Applicant's arguments filed 9/1/05 have been fully considered but they are not persuasive.

In response to Applicant's argument that:

"Park fails to disclose or suggest that the <u>transmitting of the uplink signal</u> is a first communication to which the transmission of the downlink signal is responsive." (See page 10 of Applicant's Remarks section)

the Examiner respectfully disagrees. As shown in the rejections of the Final Rejection mailed on 7/27/05 above, Park et al. discloses a mobile station sending an indication of radio channel characteristics to a base station and the base station sending, in response to receiving the indication, a signal to the mobile station at a power level that takes into account the indicated radio channel characteristics (See page 7 lines 8-23 and Figure 2 of Park et al.). It is true that Park et al. does require the base station to send a pilot signal to the mobile station; however, the claims, as currently worded, contain no limitation precluding the use of a pilot signal. In response to the claim limitations of the independent claims, Park et al. does disclose a first uplink signal, as in step 216 of Figure 2 to which the transmitted downlink signal is responsive, as in step

220 of Figure 2. The independent claims currently do not contain any limitation

indicating that the secondary station initiates the method of power level adjustment

without receiving a signal from the primary station. Further, if independent claims 1 and

2 did contain a limitation to this effect, the limitation would be in conflict with the

limitations of claim 3, which include the primary station transmitting a signal first to the

secondary station that the secondary station uses to determine channel characteristics.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Jason E. Mattis whose telephone number is (571) 272-

3154. The examiner can normally be reached on M-F 8AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Huy Vu can be reached on (571) 272-3155. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.
